

STONE WATERFALL · STAINLESS BASE

BERLIN CAPSTONE SERIES

Stone on the verticals and *Stainless where it counts.*

The Capstone gives you the look of a solid stone waterfall sink without stone at the bottom of the basin. Your countertop material wraps down the sink walls and dies into a shallow stainless steel floor — sanitary, durable, and made to last the test of time.

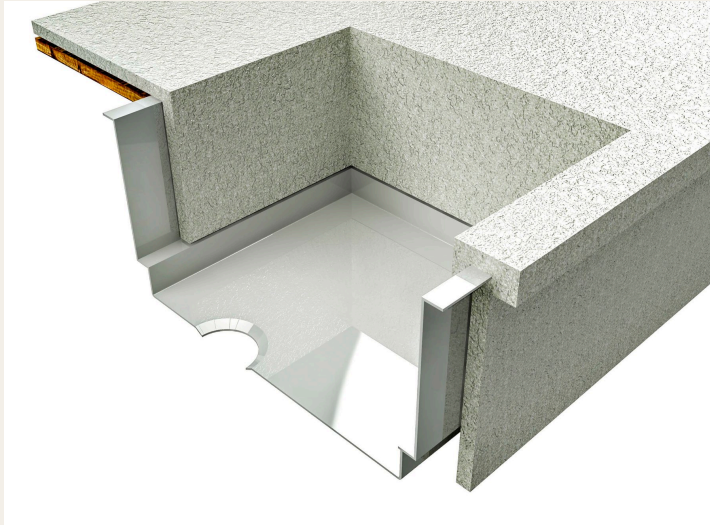

- 01 **THE WATERFALL STONE DETAIL**
Countertop stone clads every wall for a continuous, monolithic look from deck to basin.
- 02 **A SANITARY STAINLESS FLOOR**
The working surface is stainless, sloped to the drain — where water, pots and knives actually land.
- 03 **A BUILT-IN SUBSTRATE**
The stainless sink body is the solid backer the stone attaches to — no separate build-out required.

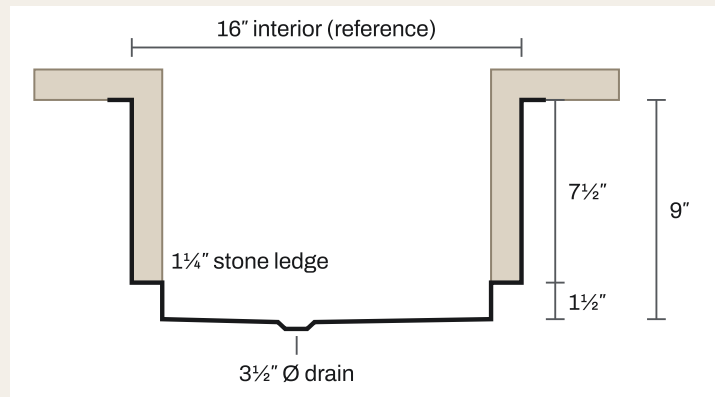

Stone walls die cleanly into the stainless floor — the crisp transition that defines the Capstone.

ENGINEERED IN SECTION

Built to *your* dimensions.

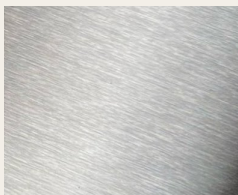

Cutaway: stone deck and walls over the stainless Capstone body.

Stone cladding (by others) — Stainless body

TWO STAINLESS FINISHES

#4 Brushed

The classic factory grain: fine, straight, directional lines with a soft satin sheen.

Hand Honed *Matte*

Finished by hand in a non-directional pattern, so everyday wear blends into the surface.

Every Capstone is fabricated to order. The reference unit below shows how the stainless body, the stone ledge and the stepped floor work together.

REFERENCE UNIT

Sizing	Custom, built to order
Mounting	Undermount, stone-clad walls
Interior (reference)	30" L × 16" W
Overall with flange	32" × 18"
Perimeter flange	1" all sides
Overall depth	9"
Stone wall height	7½"
Stainless floor step	1½" with 1¼" ledge
Drain	3½" Ø, 6¾" from wall
Floor	Cross-broken, sloped to drain

HOW IT GOES TOGETHER

- Set the body.** The Capstone mounts under the deck on its 1" perimeter flange.
- Clad the walls.** The stone fabricator bonds stone to the stainless walls, landing it on the 1¼" ledge.
- Leave the floor bare.** The 1½" stainless step and sloped floor stay exposed — easy to clean, built for daily use.

Specify yours

Use the Custom Order Worksheet on page 3 to send your dimensions, finish and stone.
